Dear Customer

Installation of new Underground Electricity Cable to Replace Overhead Lines

On the 21st of November, WPD will begin laying a new underground mains cable to replace the overhead power lines in your area. The new cable will be laid from outside the electricity substation in the Chipping Car Park and down and around into Rope Walk as far as outside the Chapel. The works we will also include moling new underground services to numbers 9,8 and 7 Rope Walk and also into the youth and social clubs. The Map on the back of this letter will hopefully make things clearer. The works will be completed by the 16th December. I have spoken to most residents with regards to these works and will endeavour to contact everyone as soon as I can.

There will be some disruption whilst the work is being carried out but we will endeavour to keep the disruption to a minimum, access will be available into Rope Walk at all times.

If you have any queries or would like more information please telephone 01452 651240.

Thank you in advance for your patience and cooperation whilst this work is being carried out.

Yours faithfully

Vernon Price
