

# Draft Local Plan | Additional housing options

The Government is considering increasing the housing numbers for Stroud District to find through its Local Plan. The Council is therefore consulting on **additional housing options** and **sites**, which could be brought into the emerging Local Plan, if required.

We would also like your views on whether and how a **reserve housing supply** should be identified, in case any of the Local Plan's site allocations were to fall short on delivering the numbers of homes expected.
